Phone: (+20) 1201131907

Manshia Cairo, Egypt

OBJECTIVE

Motivated Computer Science student with a strong foundation in C++, Object-Oriented Programming, Data Structures, and Algorithms. Experienced in developing academic and personal software projects using C++ and Python. Passionate about problem-solving, writing clean code, and continuously learning new technologies. Seeking an entry-level software development internship to apply technical skills while contributing to a collaborative development team.

EDUCATION

Ain Shams University, Faculty of Computer and Information Sciences

2024 – Present

- Bachelor's degree
- Major: Mainstream

EXTRACURRICULAR ACTIVITIES

Network Security Training | NTI & ITIDA

July 2026 – August 2026

- Completed a 120-hour summer training course in Network Security (90 technical hours, 30 soft-skills hours) with a score of 89%, certified by the National Telecommunication Institute (NTI) and ITIDA.
- Built a hands-on SOC lab as part of the training: deployed the Elastic Stack (Elasticsearch, Kibana, Fleet Server) and configured Windows Server 2016 as a domain controller (AD DS, DHCP, DNS).
- Installed and configured Sysmon and Winlogbeat on Windows endpoints to generate and ship telemetry into the SIEM.
- Integrated a FortiGate firewall (FortiOS 7.2) with the stack via syslog and Logstash to centralize firewall and Windows event logs in Elasticsearch.
- Practiced attack-surface testing (Nmap service discovery, Metasploit Samba exploitation, Hydra/NetExec SMB credential attacks) to validate detection telemetry against real attack activity.

Frontend | MSP Activity

Dec 2025 – March 2026

- Learning and practicing HTML, CSS, and JavaScript.
- Building small projects and responsive pages as part of the training.
- Collaborating with team members on technical tasks and workshops.
- Gaining experience with Git/GitHub and basic UI/UX principles.

Summer Technical Training Participant | Cyberus Student Activity

Sept 2025 – Oct 2025

- Completed intensive training covering foundational and advanced cybersecurity topics including Cross-Site Scripting (XSS), SQL Injection, basic Cryptography, Reverse Engineering, and Forensics.
- Applied learned concepts in practical labs, significantly enhancing theoretical knowledge with hands-on skill development in penetration testing techniques.

ACM (Association for Computing Machinery)

March 2025 – June 2025

- Completed ACM Level 1 training and certifications.
- Gained foundational knowledge in algorithms, data structures, and competitive programming.
- Applied ACM concepts in coding challenges and problem-solving exercises.
- Enhanced critical thinking and algorithmic problem-solving skills.

PROJECTS

Loan Prediction System | Machine Learning & Streamlit

- Developed an AI-based loan prediction system to determine whether a loan application would be approved or rejected based on applicants' personal and financial data.

- Implemented and compared multiple Machine Learning models including Logistic Regression, SVM, Decision Tree, Random Forest, and XGBoost.
- Gained experience in classification algorithms, model comparison, and AI application development.

Game Development Project: "The Last War" | SFML (C++)

- Designed and implemented a complete game, "The Last War," using the SFML library in C++ for a Structured Programming course.
- Applied structured programming methodologies to manage game logic, state machine transitions, and graphical rendering efficiently.
- Gained experience with game loop architecture, resource management, and collision detection.

Line Follower Car

- Designed and programmed a robot to follow a line autonomously using Arduino and sensors.

SKILLS

Technical: HTML/CSS, JavaScript, C++, Java, Python, Microsoft Office (Excel, PowerPoint, Word)

Soft Skills: Team worker, Communication skills, Presentation skills, Time Management, Problem Solver, Fast learner
